## OUR STORY

Star Creations Antique Furniture, registered under Star Creations Company Limited, is a bespoke furniture provider/maker and interior design business. The business established in 2014 was born out of a realization of a need for affordable bespoke furniture in the country matched with an existence of undervalued skilled carpenters and artisans.

We started by making individual furniture items e.g. Coffee tables, Mirrors, Dining Tables and chairs, Trays etc. using available old fallen timber, whereby each furniture piece told a unique story of the nature of the wood - its ruggedness, holes structure - being maintained in the making and finishing of the piece.

Overtime, we have evolved into providing interior design services due to demand and trust from our clients due to the uniqueness of the pieces and the work ethic that we exhibit. All this is born out of our major belief to value our workers and clients equally, as in the balance of life.

*We also have embarked onto a programme of Reforestation where we've planted tree seedlings, specifically of the Mugavu tree species, in Nangabo, Wakiso district to promote sustainability of the environment as mother nature continues to be our main source and the backbone of the business.*

*Our continued motivation has stemmed from customer satisfaction and recommendations done by creating pieces and designs above expectation, with the involvement of clients during the process and aiming to deliver upon their requirements.*

*We now aim to be the preferred bespoke furniture maker and provider of interior design services.*

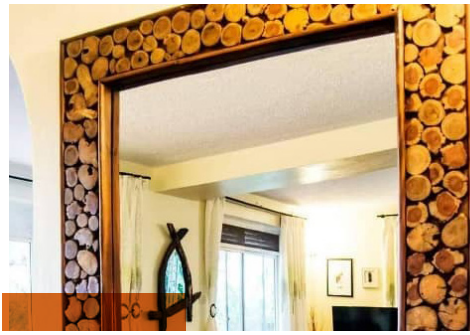

## OUR PRODUCTS *and* SERVICES

Our bespoke Furniture pieces characterized by their rustic nature are made out of local Hardwood mainly Mugavu (*Albizia coriaria*) and Mvule (*Milicia excelsa*) . Other trees include Elgon Teak, Sudan teak, Jambula, Mahogany etc.

*Dining in meticulous design and incorporation that are inviting, heart-warming and comfortable for family and guests.*

Gardens are the outdoor extensions to your home interior and your being, a place of Zen, full of beauty and life to calm the stress of the world. In this space you desire to own ornamental masterpieces; we craft them to your admiration.

We are well resourced to deliver distinct types of both traditional and modern designs that resonate with different joinery cultures. Design selections with consciousness that space is a precious and finite resource that needs to be optimized.

Conscious of the reality that the outdoors offer the opportunity for people to socialize in comfort and style.

## Green Spaces

### PICNIC TABLE

Bar-be-que weekends are enhanced and harmonized by natural characteristics, strength, toughness and elegance without compromising the environment.

### COLOR

Life in colour, we embrace that it's a worldly gift so why not add some colour to the stage scenery.

*Confident to offer our value expertise to satisfy simple or complex fit out requirements to bring your space to a well functioning and aesthetically pleasing standard. A physical site visit to help you in developing concept, special planning and implementation.*

A modern living room with large windows overlooking a mountain landscape. The room features a brown sofa, wooden coffee tables, and warm lighting. The text "Interior Fitout and Interior Décor" is overlaid in the center.

# Interior Fitout and Interior Décor

Climate change is the long-term alteration of temperature and typical weather patterns in a place. Climate change could refer to a particular location or the planet as a whole. ... Burning these materials releases what are called greenhouse gases into Earth's atmosphere.

**The 2 main culprits for this increase in greenhouse gases:**

- Fossil fuels
- Deforestation

As climate change continues, trees play an important role in carbon sequestration, or the capture and storage of excess carbon dioxide. ... Deforestation not only removes vegetation that is important for removing carbon dioxide from the air, but the act of clearing the forests also produces greenhouse gas emissions.

## CARBON CREDITS

A carbon credit is a generic term for any tradable certificate or permit representing the right to emit one tonne of carbon dioxide or the equivalent amount of a different greenhouse gas.

The goal is to allow market mechanisms to drive industrial and commercial processes in the direction of low emissions or less carbon intensive approaches than those used when there is no cost to emitting carbon dioxide and other GHGs into the atmosphere. Since GHG mitigation projects generate credits, this approach can be used to finance carbon reduction schemes between trading partners and around the world.

# Climate Change

If we don't stop deforestation, more than half of our plant and animal species will be extinct. It is the oldest ecosystem on Earth and they are impossible to replace. It took millions of years for rainforests to develop... how can we replenish fast enough to cope with the rate of deforestation? For every tree cut or fallen, plant 2 or 3, we all have our part to play.

Carbon credits and carbon markets are a component of national and international attempts to mitigate the growth in concentrations of greenhouse gases. One carbon credit is equal to one tonne of carbon dioxide, or in some markets, carbon dioxide equivalent gases. Carbon trading is an application of an emissions trading approach. Greenhouse gas emissions are capped and then markets are used to allocate the emissions among the group of regulated sources.
